Welcome to Dentale

dentale Patients

Here at Dentale, we feel that it's as important for our patients to get to know us as it is for us to know them, so let us introduce ourselves! We invite you to read a little more about who we are and what we do.

Who are we?

At Dentale, we train dentists in the provision of dental implants. This is a continuous, ongoing process taking dentists from their first implant all the way up to the most complex procedures. All this training is supervised closely by our extremely qualified team which gives the patient all the benefit and confidence in their experience, and gives the dentist the benefit of a safe and controlled environment.

Our Training Dentists

Although we make reference to a "training dentist", all the dentists who attend our courses are fully qualified general dentists and registered with the General Dental Council. So for example, they are already qualified to see you for a general check-up and carry out other treatments including fillings, crowns and any other treatment that you would expect to receive from your own dentist. In fact, many of them already have their own practices. The dentists come to Dentale to further their skills

and learn the art of implant dentistry.

We also ensure that each "training dentist" has an appropriate amount of theoretical knowledge before they are allowed to carry out any treatments on our patients. Furthermore, we match the complexity of the case to the ability of the dentist to make sure that the appropriate dentist treats the appropriate patient.

Our Course Tutors

Every course is delivered by a course tutor who has decades of Implant experience. Only a small number of "training dentists" are booked onto each course to ensure that the course mentor can provide the appropriate support and guidance.

What does this mean for our patients?

We can offer Dental Implants cheaper than going abroad. Dentists are prepared to pay for a high standard of training and this in turn enables us to offset the cost for the patient.
